Patrick Clarke

FULLSTACK DEVELOPER

PROFILE

I'm a young aspiring Fullstack Developer who is always striving to improve my skill. I am eager to learn new things and put them into practice so that I can create amazing and user-friendly websites. I am also trying to branch out into other areas such as Android development and graphics design. Becoming the best at creating websites and apps that make users and clients happy is the skill I am working the hardest to polish. Much of my time is invested in reading books and watching courses that add to my pool of knowledge.
